 - 2. Absent Team Member
 - a) **Substitute not available:** In each clipboard there is a sheet titled Handicap Format. This sheet contains columns listing AVG, HCP, BLIND SCORE. To determine the **blind score** for the scoresheet, locate the missing player’s average or handicap and look under the BLIND SCORE column for his blind score. **For Example:** Missing

players average is 18 (handicap 32) his blind score for the night is 45. His team Total score for each game would be 45 ($32+13=45$).

- b) **Substitute available:** The substitute's average and handicap are used.
 - c) **Substitute without a handicap:** Determine the individual's average after the completion of the four games. Go to the Handicap Format sheet in the clipboard to determine the handicap. Enter the handicap on the scoresheet each of the games and then add to his score to get the total score. **For Example,** the individual pitches a 38 for the four games, his average is 9.5 and you round it up to 10. Go to the Handicap Format sheet in the clipboard, under the AVG column find 10 and under the HCP column his handicap is 39. Add 39 to each of his games scores for the total score.
